THE ONE-PRICE-HOUSE

TO ALL WHO READ THIS

We extend a cordial invitation to call on us at your very earliest opportunity and have us show you our Mammoth Stock of Merchandise.

OUR STOCK

is now very large and complete, consisting of everything usually found in a First-Class Dry Goods House, together with a full line of Clothing, Carpets, Trunks, and Valises. We wish to say

WE ARE NOT CLOSING OUT

our stock at cost, but our customers are living witnesses to the fact that we are underselling these so-called Cost-Houses. This cost business is only a trick to induce you to buy goods laid in when high, and which are not worth to-day the money they ask for them at retail, even if they do offer them at what they cost them.

Goods were never lower in the history of the country than they are to-day, and this is why we can sell you Goods cheaper than the man who really offers at cost goods purchased by him twelve months ago; and be assured it is only goods bought when high that any of them are offering at cost. So now we want to say that almost all our Very Large Stock was laid in "New" This Spring, having run our stock down very low last winter, when Mr. Robinson retired from the firm. So this explains why the Goods we are offering at a SMALL PROFIT are still cheaper than the same goods which the "Closing Out House" claims to be, and in some instances may be, offering at cost. Remember, we rely for our support on

LARGE SALES AND SMALL PROFITS.

Remember we have but one price and that we guarantee in every instance the very lowest of any market in the country. Don't fail to call at

Republicans! Do you know what to expect? See last week's Grumbler.

A little six year old told his ma that he had an egg-sellent time on Easter.

Its terrible to think that the republican party has sealed its doom just because Jake went to convention instead of Ben.

A razor cyclone struck the Normal last week. Professor Sheldon had to identify himself before his classes would receive him.

Strange to say the sun came out and showed himself on Wednesday. It was considered quite a novelty and elicited much attention and no little remark.

If one Normal student should hit another over the head and disable him would he be excused from class on account of "inflammatory room-mate-ism."

To get rid of the smell of paint, says an exchange, slice onions and leave them in the room. To get rid of the smell of onions put on another coat of paint.

Its awfully encouraging for an editor to receive a letter from a subscriber six years in arrears saying, "let me know when my time is out I want to renew."

Our correspondent didn't call the editor of the Democrat a demjahn, and hence his indignant denial that such is the case is all uncalled for. A demjahn is no small affair.

The Queen City people aver there was nothing wrong with the grub set forth at the depot restaurant, and criticised by the Criterion. Everything was in good order but the Cutler-y.

As long as the wind keeps in the east the Weekly Grumbler may be expected to growl. When a lion has lost all his teeth there is nothing left but to growl. We beg pardon of the lion for the comparison.

If you see a man going to church with no neck tie, the jinning out of his hat, his silk handkerchief gone, holes in the velvet lining of his coat, and a general dilapidated appearance, don't think misfortune has struck him; his wife is making a crazy patchwork quilt.

Bay Day's Horse and Cattle Powder. Each package contains information valuable to the farmer and stock raiser. Day's veterinary preparations are the best in use. Keep a package at your stables and barn yards. Price twenty-five cents per package of one pound full weight.

A subscriber who recently returned from Florida gives us a glowing description of that country. Here we are shivering around our stoves; down there the people are luxuriating on canned fruits, vegetables, fleas, flies and other summer delicacies. This is truly a very gay country.

Another serious objection to the GRAPHIC: One of our former subscribers on renewing said he ought to stop the paper till the crop was in, for whenever it came he couldn't "get any work out of the hired hand 'till he had read it!" When we come to consider that the GRAPHIC gives between forty and fifty columns of reading matter each week, the objection becomes a pretty serious one. If we only give what some of our contemporaries give, the hired hand would not be delayed that "Y serious extent."

Oh my! Go to C. C. Bennetts at once. Finest assortment of candies ever brought to town.

Pickler, Bounds & Mears want a car load of horses and mules at once. Bring them in and get the cash.

On Saturday May 3d, there will be a stock sale at the Brick barn, also household goods and furniture. Anything you want sold bring it in on that day and R. W. Mears will sell it for you.

Diamond Spectacles at HART & MILLER'S.

The tide of immigration setting toward our shores is subject to fluctuations, but there exists no reason to anticipate that during the life of the present generation it will fail to reach the average height of the past ten years; immigration, therefore, continues to be one of the great economic questions of this country, and it involves a political problem of the highest importance, that of naturalization. That our naturalization laws are defective in many respects is notorious, and the demand for their revision will no doubt acquire added force from the publication of an article by Justice William M. Strong upon that subject in the North American Review for May. In the same number of the review Edwin P. Whipple offers a candid judgement of Matthew Arnold, as a thinker and as a man of letters. Richard A. Proctor, under the title of "A Zone of Worlds," writes of the vast multitude of the pigmy kindred of the earth, known as the asteroids. In "The Railway and the State," Gerrit L. Lansing essays to prove that the multiplication and extension of railroad lines, and the establishment of low rates of transportation, are hindered rather than helped by governmental interference. Prof. Henry F. Osborn, of Princeton College, has a highly interesting article on "Illusions or Memory." Helen Kendrick Johnson contributes an essay on "The Meaning of Song." Finally, there is a joint discussion of "Workingmen's Grievances," by William Godwin Moody and Prof. J. Laurence Laughlin, of Harvard University.

W. C. Butler, of Springfield, Ark., last fall crushed his sorghum cane without stripping the green fodder from it, and he is of the opinion that he made as much sorghum as if he had stripped it clean. All the dry or dead blades were removed before crushing.

Railroad Items.

W. E. Foster and wife are visiting Yates Center Kansas.

We hear that the Wabash contemplates a general change of depot and grounds at this place. We are glad to hear it. There is room for improvement.

It is reported that the Wabash will begin in June to furnish two cars of iron per month, to each section, till the road is in thorough repair. New ties and bridge timbers are now being delivered on the road.

Art Novelty.

We have been shown a novelty in the way of a photographic tore and back picture that makes a very striking picture. The design originated with our accomplished local artist, Mr. G. W. Tull. The subject is shown as if some young Diana like, from the clouds, and the effect is very pleasing. Mr. Tull originated the design some time since and communicated his idea to a prominent New York scene painter from whom he ordered the necessary grounds. In the 1st number of the Photographic Bulletin we see the idea has been appropriated by one of the leading N. Y. photographers. Mr. Tull is now prepared to make this new artistic novelty for his customers. Call and see him.
